L-17 Conversion of Mealy Machine to Moore Machine -3

Given below is a Mealy Machine that prints '1' whenever the sequence 'aa' or 'bb' is encountered in any input binary string from Σ^* where Σ = {a,b}.
DESIGN THE EQUIVALENT MOORE MACHINE FOR IT.

Conversion of Mealy Machine to Moore Machine - Examples (Part-1)

Given below is a Mealy Machine that prints '1' whenever the sequence 'aa' or 'bb' is encountered in any input binary string from Σ^* where $\Sigma = \{a,b\}$.

DESIGN THE EQUIVALENT MOORE MACHINE FOR IT.

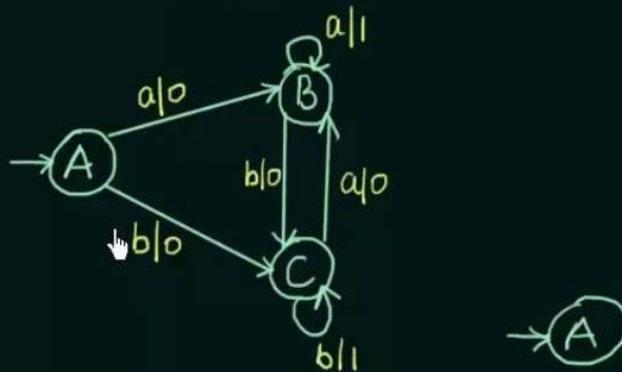

$\Sigma = \{a, b\}$

$\Delta = \{0, 1\}$

Conversion of Mealy Machine to Moore Machine - Examples (Part-1)

Given below is a Mealy Machine that prints '1' whenever the sequence 'aa' or 'bb' is encountered in any input binary string from Σ^* where Σ = {a,b}.
DESIGN THE EQUIVALENT MOORE MACHINE FOR IT.

$\Sigma = \{a, b\}$
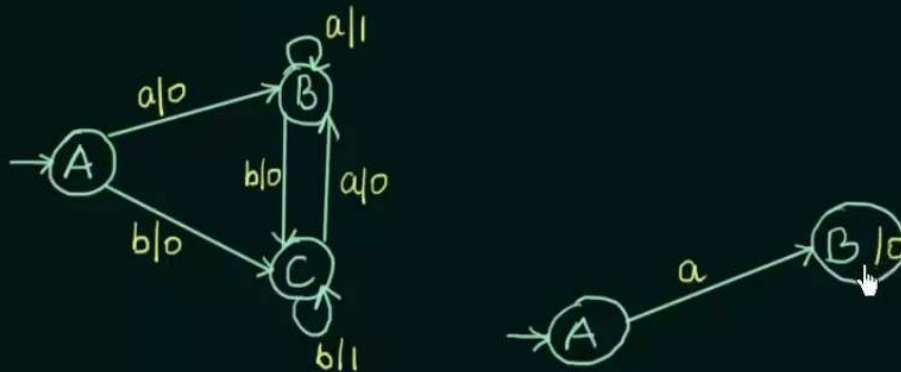

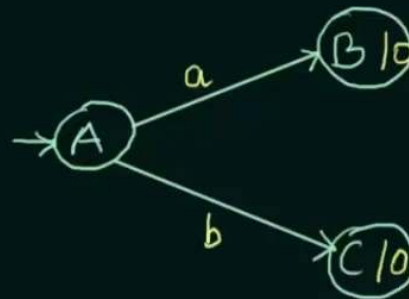

$\Delta = \{0, 1\}$

Conversion of Mealy Machine to Moore Machine - Examples (Part-1)

Given below is a Mealy Machine that prints '1' whenever the sequence 'aa' or 'bb' is encountered in any input binary string from Σ^* where $\Sigma = \{a,b\}$.
DESIGN THE EQUIVALENT MOORE MACHINE FOR IT.

$\Sigma = \{a, b\}$
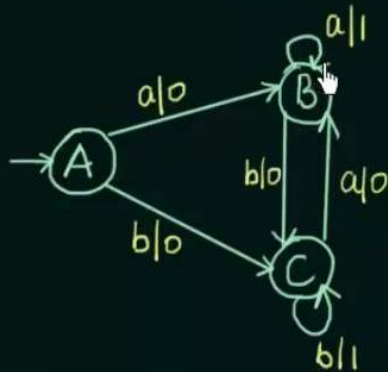

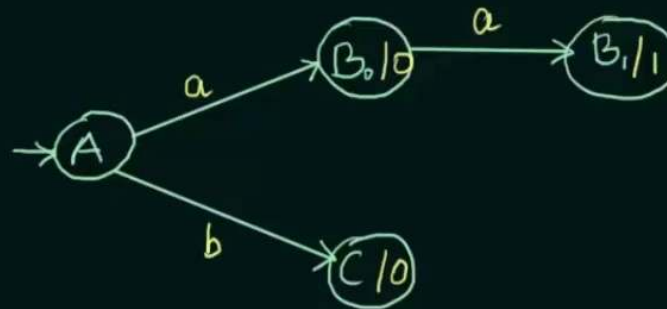

$\Delta = \{0, 1\}$

Conversion of Mealy Machine to Moore Machine - Examples (Part-1)

Given below is a Mealy Machine that prints '1' whenever the sequence 'aa' or 'bb' is encountered in any input binary string from Σ^* where $\Sigma = \{a,b\}$.
DESIGN THE EQUIVALENT MOORE MACHINE FOR IT.

$\Sigma = \{a,b\}$
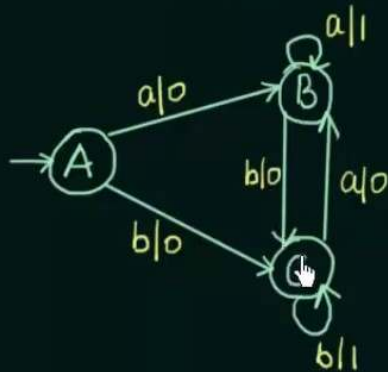

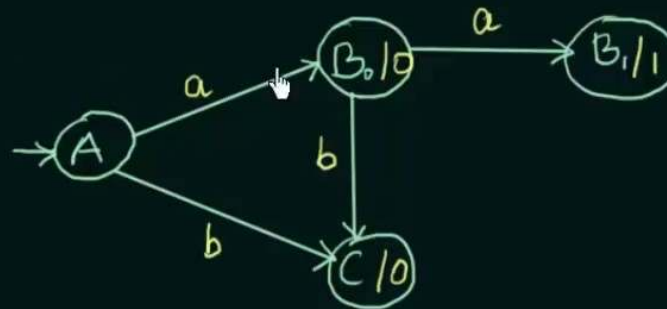

$\Delta = \{0,1\}$

Conversion of Mealy Machine to Moore Machine - Examples (Part-1)

Given below is a Mealy Machine that prints '1' whenever the sequence 'aa' or 'bb' is encountered in any input binary string from Σ^* where Σ = {a,b}.
DESIGN THE EQUIVALENT MOORE MACHINE FOR IT.

$\Sigma = \{a, b\}$
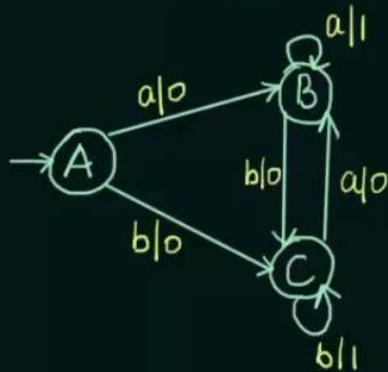

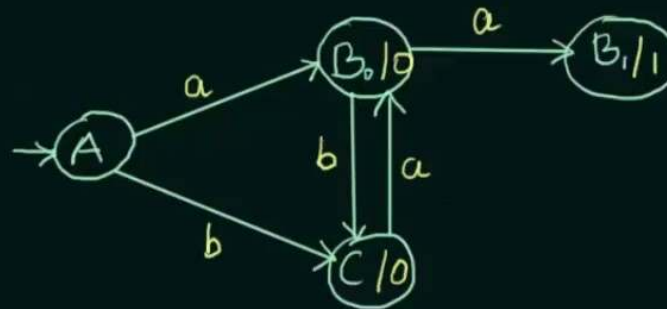

$\Delta = \{0, 1\}$

Conversion of Mealy Machine to Moore Machine - Examples (Part-1)

Given below is a Mealy Machine that prints '1' whenever the sequence 'aa' or 'bb' is encountered in any input binary string from Σ^* where $\Sigma = \{a,b\}$.
DESIGN THE EQUIVALENT MOORE MACHINE FOR IT.

$\Sigma = \{a,b\}$
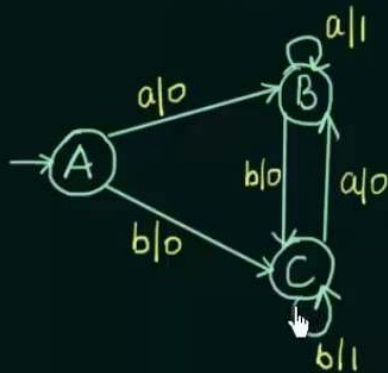

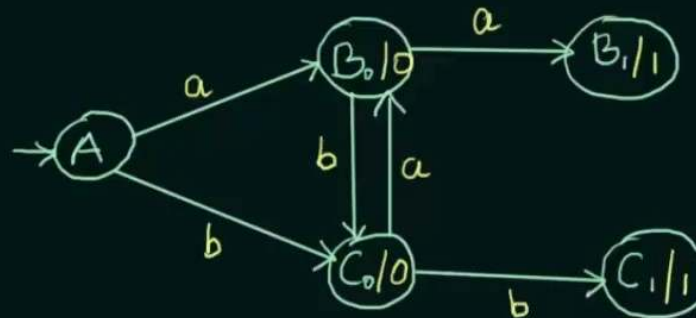

$\Delta = \{0,1\}$

Conversion of Mealy Machine to Moore Machine - Examples (Part-1)

Given below is a Mealy Machine that prints '1' whenever the sequence 'aa' or 'bb' is encountered in any input binary string from Σ^* where $\Sigma = \{a,b\}$.

DESIGN THE EQUIVALENT MOORE MACHINE FOR IT.

$\Sigma = \{a,b\}$
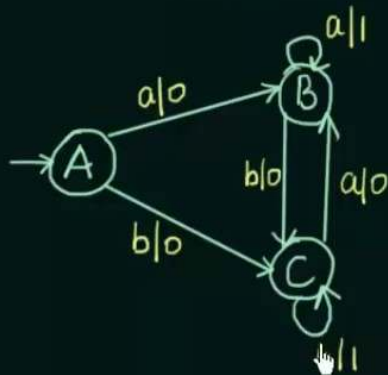

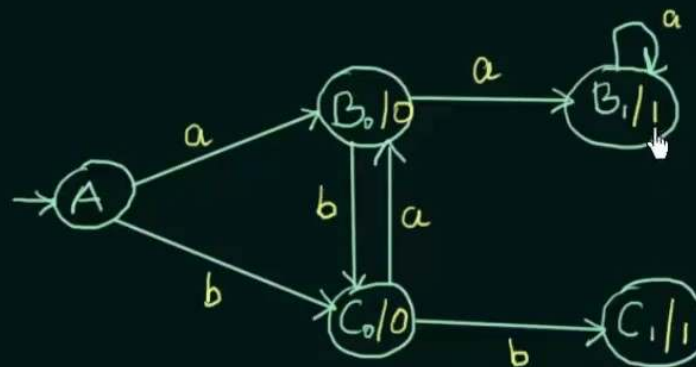

$\Delta = \{0,1\}$

Conversion of Mealy Machine to Moore Machine - Examples (Part-1)

Given below is a Mealy Machine that prints '1' whenever the sequence 'aa' or 'bb' is encountered in any input binary string from Σ^* where $\Sigma = \{a,b\}$.

DESIGN THE EQUIVALENT MOORE MACHINE FOR IT.

$\Sigma = \{a, b\}$
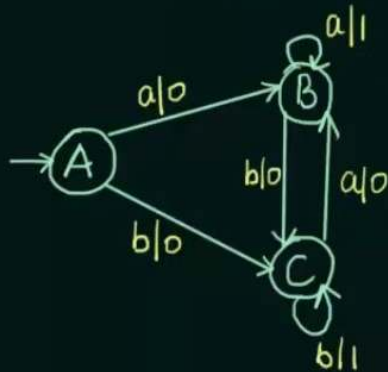

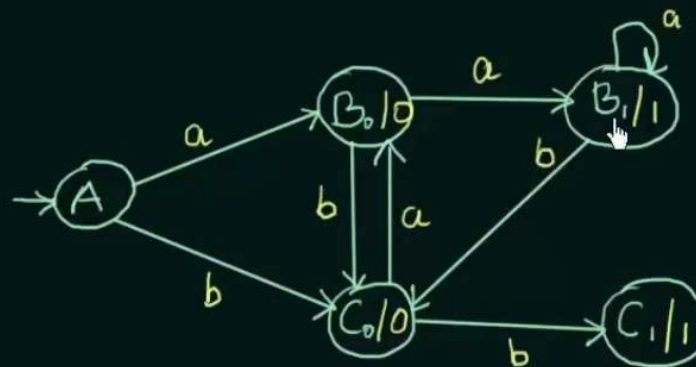

$\Delta = \{0, 1\}$

Conversion of Mealy Machine to Moore Machine - Examples (Part-1)

Given below is a Mealy Machine that prints '1' whenever the sequence 'aa' or 'bb' is encountered in any input binary string from Σ^* where Σ = {a,b}.
DESIGN THE EQUIVALENT MOORE MACHINE FOR IT.

$\Sigma = \{a, b\}$
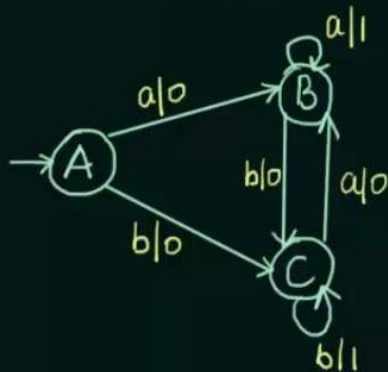

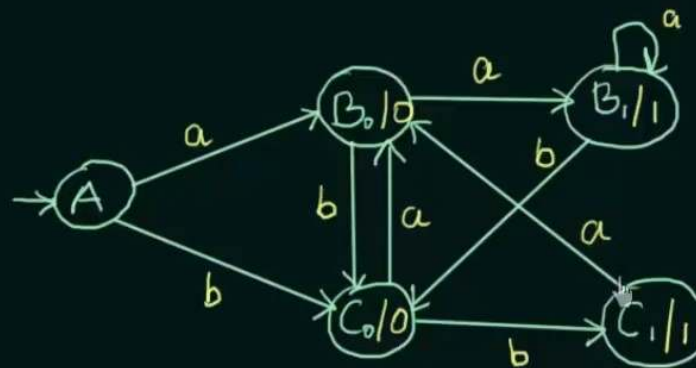

$\Delta = \{0, 1\}$

Conversion of Mealy Machine to Moore Machine - Examples (Part-1)

Given below is a Mealy Machine that prints '1' whenever the sequence 'aa' or 'bb' is encountered in any input binary string from Σ^* where $\Sigma = \{a,b\}$.
DESIGN THE EQUIVALENT MOORE MACHINE FOR IT.

$\Sigma = \{a, b\}$
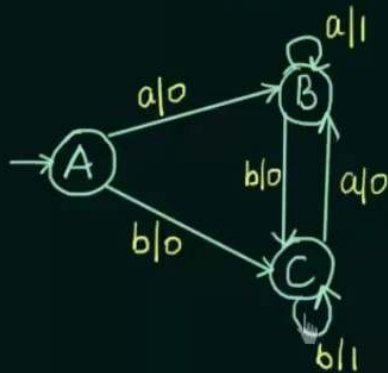

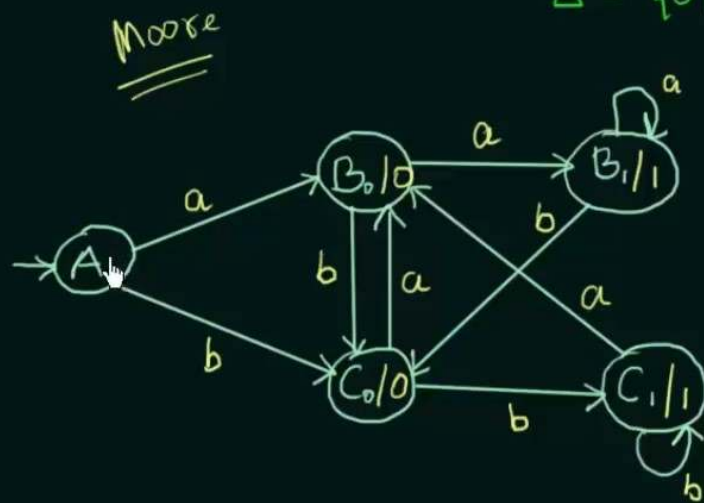

$\Delta = \{0, 1\}$

Conversion of Mealy Machine to Moore Machine - Examples (Part-1)

Given below is a Mealy Machine that prints '1' whenever the sequence 'aa' or 'bb' is encountered in any input binary string from Σ^* where $\Sigma = \{a,b\}$.
DESIGN THE EQUIVALENT MOORE MACHINE FOR IT.

$\Sigma = \{a,b\}$
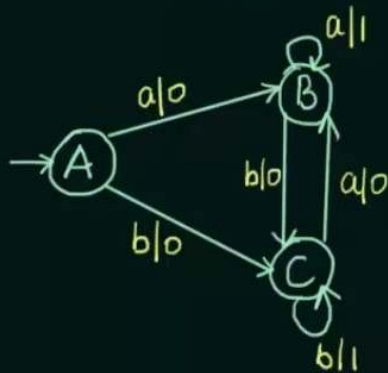

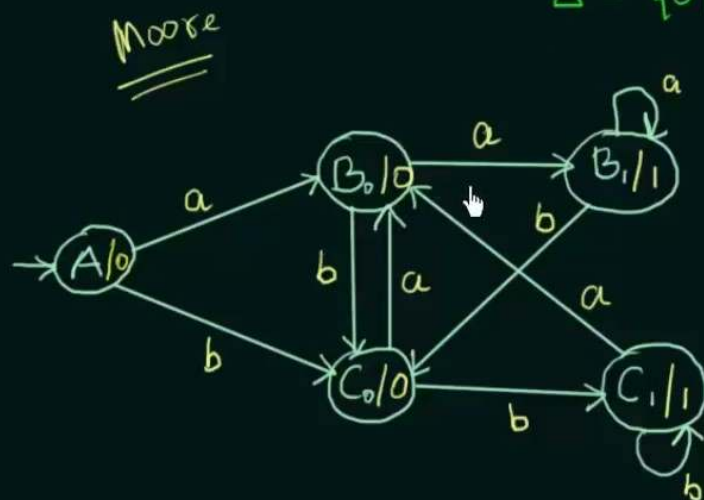

$\Delta = \{0,1\}$

Conversion of Mealy Machine to Moore Machine - Examples (Part-1)

Given below is a Mealy Machine that prints '1' whenever the sequence 'aa' or 'bb' is encountered in any input binary string from Σ^* where $\Sigma = \{a,b\}$.
DESIGN THE EQUIVALENT MOORE MACHINE FOR IT.

$\Sigma = \{a,b\}$
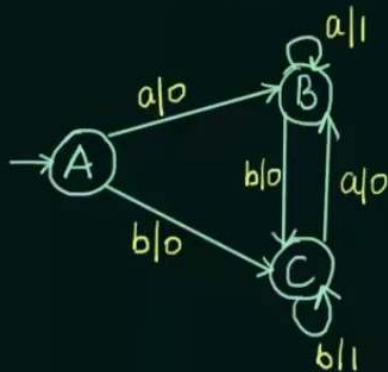

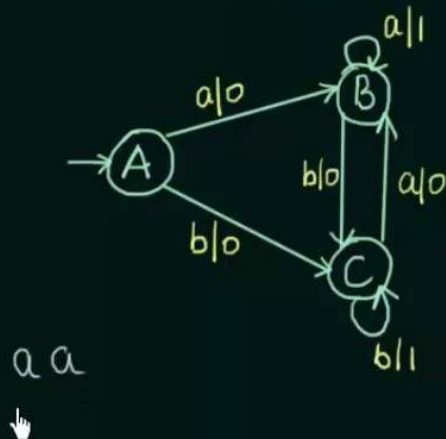

$\Delta = \{0,1\}$
